Add depth with high-gloss

Give your clients something to reflect on for years. RAUVISIO surfaces provide the perfect solution for any type of high-gloss project.

RAUVISIO brilliant

20+ years of UV stability allow your white to stay white

Mirror-like reflective quality to view life perfectly at any angle

Double-sided high-gloss for a true monolithic panel

RAUVISIO brilliant™ offers the highest quality in high-gloss. Our components feature double-sided, high-gloss acrylic surfaces laminated onto super-refined MDF in a PUR clean room environment to ensure a mirror-like reflective quality.

RAUVISIO brilliant is the next generation in high-gloss surfaces, surpassing high-quality lacquered boards with a brilliant depth effect.

Unlike competitive surfaces using a clear top layer, we color match our PMMA top layer to the acrylic laminate, adding color depth and **20+ years of UV resistance.**

Slab profile**Shaker profile****Top:** Slab door and drawer**Bottom:** Shaker door**Profile Specifications**

Appearance	High-gloss
Door style	Slab and shaker
Design style	Modern, contemporary
Construction	PUR laminated face and back, REHAU LaserEdge
Shaker stiles and rails	3 in (76.2 mm), custom widths also possible
Face material	High-gloss acrylic, multiple colors
Back material	High-gloss acrylic, matching color
Edgeband	REHAU LaserEdge, matching color
Core	Super-refined MDF
Board thickness	3/4 in (19.5 mm)

Size Parameters

Minimum	3 x 5 in (76.2 x 127 mm)
Maximum	50 x 109 in (1270 x 2768.6 mm)
Minimum shaker size	6 x 12 in (152.4 x 304.8 mm) using 2.75 in. rails

Edgebanding Profile

Top edge	1.0 mm radius
Bottom edge	1.0 mm radius
Edgeband finish, standard	Mirror gloss, color matched
Edgeband finish, optional	V-edge two-toned metallic, color matched (select colors)

Accessory Products

1/4 in. thick components	Cut-to-size with raw edges
Integrated handle	1 17/64 and 5/64 in (32 and 2 mm)
Floating shelves	22 to 96 in (558.8 to 2438.4 mm) wide

RAUVISIO brilliant is offered as individual matching components (laminated, pressed board and edgeband) or as finished, cut-to-size components with REHAU LaserEdge applied, making high-gloss available to any shop without investment in machinery.

What is REHAU LaserEdge?

REHAU LaserEdge™ is an adhesive-free edgeband with a co-extruded polymer functional layer replacing the traditional glue used to apply edgeband. The technology allows for a superior and seamless joint between the edgeband and the board.

Board Specifications

RAUVISIO brilliant is flat-laminated to a high-quality, super-refined, engineered MDF core that is PEFC, CARB2, TSCA Title VI certified which provides a stable, consistent substrate and virtually eliminates warping.

Edgeband Specifications

All components are edgebanded with REHAU LaserEdge, which provides an extremely heat and moisture resistant seamless joint rivaling solid surfaces and exceeds high-end lacquer finishes.

Cleaning and Care

Clean with a damp microfiber cloth and with a mild soap if needed. Do not dry-wipe the acrylic finish. Avoid abrasive cleaners, solvent-based cleaners and harsh chemicals. Do not use paper towels, brushes or scouring pads. REHAU is not responsible for any damage done by abrasive cleaning products or procedures.

Protective Coat

A protective peel coat is applied to the top of the high-gloss surface, as well as to the edgebanded sides. Do not expose peel coat to direct sunlight before removal. Remove promptly after installing cabinet but prior to mounting decorative hardware. To remove peel coat, use rubber fingertips or our peel coat removal tool.
